TABBED STORAGE SLEEVE AND RETRIEVAL SYSTEM FOR PLANAR OBJECTS AND DISC MEDIA

Inventor:

Loren Dean Balzer

Cross Reference to Related Application:

[0001] This application is a continuation-in-part of the U.S. Patent Application entitled TABBED STORAGE SLEEVES having U.S. Serial No. 09/757,596, and filed on June 27, 2001, now abandoned.

BACKGROUND OF THE INVENTION

Field of the Invention

[0002] This invention relates to tabbed storage devices for storing one or more planar files, records, cds, dvds or electronic disk media.

Description of the Related Art

[0003] Manufacturers of electronic disk storage media such as a cd, dvd, video and mini-discs and other media formats have commonly resorted to packaging their product in paper or vinyl sleeves wherein the media disk or record is placed in a protective pocket of the sleeve without any means or intended means to allow for a method of a filing. Such a sleeve has a pocket which is opened at one end for inserting or removing articles. This type of sleeve suffers from the following disadvantages:

[0004] (a) the sleeve is too thin to write on the edges so as to identify the sleeve when laid on its side or when stacked on top one another or placed in a file amongst a large quantity of sleeves;
